

PRESS RELEASE

Paris, 17 October 2024

ALL4PACK INNOVATIONS AWARDS 2024 AND THE WINNERS ARE...

As a genuine crossroads for exchange among industry players, the international tradeshow ALL4PACK EMBALLAGE PARIS is positioned as a think tank deciphering the innovative aspects of packaging, its technological breakthroughs, circularity and digital transformation. In keeping with this approach, the show organises the ALL4PACK INNOVATIONS Awards, a headline initiative distinguishing the most outstanding new solutions and innovations in the packaging and intralogistics field. These awards offer recognition to companies that stand out through their creativity and their commitment to sustainable and efficient practices.

The judges of the ALL4PACK INNOVATIONS AWARDS, members of the show's Pack Experts Committee,⁽¹⁾ studied the entries of the 20 finalists shortlisted by a first panel made up of French and international journalists. Following their deliberations held on 15 October, they selected seven winners.

"This 2024 vintage is fully representative of what is happening in all packaging sectors: innovative responses to apply the three Rs: reduction, recycling and reuse, but also innovative materials, improved features and higher industrial efficiency," commented **Fabrice Peltier**, expert consultant in eco-design, and member of the Pack Expert Committee.

THE ALL4PACK INNOVATIONS AWARD WINNERS ARE:

RECYCLING CATEGORY

MONDI FLEXPACK TRADING GmbH

Stand M 062

Protective Mailer

Mondi's Protective Mailer is an innovative paper-padded envelope for eCommerce deliveries, replacing plastic bubble-wrap padding with its shock absorbent, fully paper-based, protective padding that is designed for circularity and recyclable in all markets. The use of open flute padding provides necessary protection for a variety of products. The mailers are made from high performance and strong paper. They come in both standard and customisable sizes.

REDUCTION CATEGORY

PACKSIZE GMBH

Stand F 095

On Demand Packaging® X5®

The world's first automatic assembly system for made-to-measure American boxes (Fefoc 0201). This fully-automated system revolutionises the need for packaging by producing ready-to-pack, made-to-measure boxes online. 'On Demand Packaging® X5®', a leading packaging automation system, the X5 cuts, print, folds, glues, assembles and labels ready-to-pack, made-to-measure boxes before automatically sending them to a automatic line.

REUSE CATEGORY

RAJA

Stand N 066

RE-ZIP reusable packaging

Designed to answer the expectations of responsible consumers, Re-Zip is the world's first range of packaging that is both reusable AND recyclable, contributing to the reduction of waste. Protective, durable and easy to use, the shipping envelopes and boxes are made from FSC cardboard in 15 sizes. Once they've received their parcel, customers simply return the packaging to a drop point. It is then cleaned and returned to stock for a new shipping cycle.

FUNCTIONALITY AND USE CATEGORY

SEALED AIR SAS

Stand N 052

Korrvu® Rapid Fix - Securing system using locking

The Korrvu® Rapid Fix system secures items in seconds. Versatile and adaptable to different products, it reduces delays from manual placement of cushioning materials. Available with non-slip film or cardboard mesh, the insert minimises damage and enhances presentation. Both options are recyclable, reducing volumetric weight and waste. Offered in white or brown cardboard, this system has two locking options and can be customised for a better unboxing experience, boosting customer satisfaction.

INDUSTRIAL EFFICIENCY CATEGORY

SCREEN EUROPE

Stand F 156

Truepress PAC 830F

The Truepress PAC 830F is SCREEN's latest single-pass industrial inkjet digital printer. The flexible packaging industry is experiencing a swift evolution, and this press is prepared to meet these developments, bringing all-new technological innovations to print at 1200 x 1200 dpi resolutions on various recyclable plastic films (PET, BOPP & MDO-PE) at speeds up to 75m/min to deliver quality, flexibility, sustainability and cost-effectiveness to meet changing demands in flexible packaging.

JOINT WINNERS

NOVATEC INDUSTRY

Stand P 023

SEP Seal Eco Paper Filter

Our Seal Eco Paper_Filter is heat-sealable and breathable, making it possible to coat porous paper without the problems encountered with aqueous varnish (composed of 60% water) which passes through the paper when it is applied. Seal Eco Paper_Filter is available in a variety of formats, supplied in flat, padded or sleeve rolls, and can be adapted to existing packaging machines (minor modifications required). An innovative product manufactured using our exclusive ERS-Enduction Riccobono System.

RELEAF PAPER

Stand ST 018

Fallen leaves box

Strong and stylish delivery boxes with fibres of fallen leaves. We developed unique material "Releaf Paper" which reduced using of virgin and recycling fibres and substitutes them with natural fibres of urban green waste. Our Releaf Boxes are strong enough for using in e-Commerce, retail and other areas and then to be recycled in standard paper wastes stream. Huge advantage of our products is lower carbon footprint on every stage of lifecycle: from sourcing raw materials to production.

The winning products can be found at the show from 4 to 7 November on the stands of the respective exhibitors, and in the ALL4PACK Innovations area.

The awards ceremony will take place at the show on Wednesday 6 November and will be followed by a drinks reception.

⁽¹⁾The Pack Expert Committee is made up of professionals from international groups that feature among the most important in their sectors:

- **Benjamin BOLLOT** - R&D Senior Scientist Fabric and Home care Packaging Sustainability, P&G

About ALL4PACK EMBALLAGE PARIS

The 2024 edition of ALL4PACK EMBALLAGE PARIS will be held at Paris Nord Villepinte from 4 to 7 November.

An international generalist tradeshow held every two years, ALL4PACK Emballage Paris is a true reference in the Packaging and Intra-logistics eco-system. Today, the show's mission is to support professionals in responding to an unprecedented revolution and rising to the new ecological challenges that they are facing. To do so, it brings together all the innovations, trends, and expertise at the service of user industries. It offers a global approach for specific, sustainable, and responsible solutions to the performance issues of professionals in the sector: packaging, machines, logistics. This unique exhibition brings together the top decision-makers from 11 industrial sectors: Food, Beauty & Hygiene, Consumer Goods, Capital Goods, Beverages & Liquids, Distribution and e-commerce, Luxury goods, Pharmacy & Health, Services, Transport & Logistics, other multi-industries...
